Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on November 21, 2006 has been entered.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claim 23 is rejected under 35 U.S.C. 102(b) as being anticipated by Joao (US 6,549,103).

Joao teaches a data packet adapted to be transmitted from a first computer process to a second computer process, comprising:

disconnect data related to at least one of disabling and re-enabled one or more pieces of dangerous equipment, the disconnect data generated by a key analyzer in response to analysis performed on one or more pieces of electronic key data read from an electronic key by an electronic key reader and the status of one or more pieces of dangerous equipment (col. 42, lines 55-59; col. 43, lines 7-13); and

Art Unit: 2876

logging data associated with at least one of electronic key data, the disconnect data and the dangerous equipment operation.

Allowable Subject Matter

4. Claims 1, 2, 4-10, 12-18, 20-22, 24, 26-29, and 31-34 are allowed.

5. The following is a statement of reasons for the indication of allowable subject matter: the prior art of record fails to teach or fairly suggest either alone or in combination thereof, a system or method that electronically controls a physical operation of dangerous equipment comprising:

an electronic key that stores electronic key data separately from the dangerous equipment, the electronic key data comprises at least one or key holder identity information, key holder task, and estimated time to complete the key holder task;

a logging component that logs information concerning at least one of the electronic key data, the electronic key reading component, the electronic key data analyzing component, the disconnect control data, or the disconnecting component;

an electronic key data analyzing component; and

a disconnecting component.
